Summary

Passionate Software Developer proficient in the MERN stack, crafting dynamic and scalable web applications. Strong expertise in Data Structures and Algorithms with C++ to solve complex problems efficiently. Dedicated to writing clean, maintainable code and continuously learning cutting-edge technologies. Driven to deliver innovative solutions that enhance user experiences and business outcomes.

Education

B.tech CSE At - Baba Farid College of Engineering And Technology Aug 2022 –June 2026

Aggregate Percentage -80%

Projects

A. Real Time Chat Application (MERN + Socket.io)

1.User registration & login with JWT and passwords securely hashed using bcrypt
2.Instant message delivery using Socket.IO and bi-directional communication without page reload
3.Chat history saved in MongoDB and auto-load past messages on chat open.
4.Show who's online using Socket.IO connections and updates dynamically as users connect/ disconnect.
5.Clean chat interface and works well on desktop and mobile devices.
6.Modular API for users, chats, and messages and efficient real-time handling through centralized Socket.IO logic

B. Chatbot (MERN + Gemini APi)

1.Users interact with a Gemini-powered chatbot for queries, creative prompts, and coding help.
2.Secure JWT-based authentication with a credit system limiting API usage per user.
3.AI-generated images can be created from prompts and uploaded to a shared community page.
4.Dashboard allows users to track credits, view interaction history, and manage uploads.

C. TechSoul – Course Platform Web App

1.Public pages include Home, About, and Solutions with responsive design.
2.Users can send contact messages stored in the database for admin access.
3.Course listings with filters, detailed views, and category-based browsing.
4.Secure login with JWT, bcrypt, and form validations for protected access.
5.Role-based access with admin-only dashboard and route protections.
6.Admin panel to manage users, messages, and courses with stats overview.
7.Full CRUD operations for courses, messages, and users with validation.
8.Error handling with proper feedback, 404 pages, and user-friendly alerts.

Skills

Frontend : Html5, CSS3, React.js, Tailwind CSS, JavaScript, Redux , Context Api, Zustand .
Backend : Express.js, Next.js, Node.js, MongoDb , REST APIs, WebSockets .
Tools: Git/ Github, VsCode , Postman, Vercel, Render .

Experiences/ Achievements

Reader of the Month — BFCET Library (Oct 2023)
Recognized for active reading habits and promoting a positive reading culture; awarded certificate and featured on the library display.

BFCET National Level Hackathon
Competed among 50+ teams across India, secured 10th position. Gained valuable experience through 36 hours of intense coding and collaboration with peers.

Interests

a. Coding b. Reading-Fiction c. Communication d. Learning New Skills
